

SAFE WATER, SANITATION AND HEALTH FOR ALL DURING AND POST COVID 19

7 July 2020 | 6.00 - 7.30pm IST (Geneva time is 2.30 - 4pm)

Speaker

KATE MEDLICOTT
Sanitation Team
Leader, WHO

Speaker

CHRISTINE MOE
Professor,
Emory University

Speaker

BHITUSH LUTHRA
Programme
Manager, CSE

Speaker

**DR ABDULLAH
AL-MUYEED**
Head of Policy and
Advocacy, WaterAid
Bangladesh

Moderator

**DR SURESH
ROHILLA**
Senior Director, CSE

Discussant

KHAIRUL ISLAM
WaterAid -
Regional Director
(Bangladesh)

COVID19 has reinstated the need for global action to ensure access of clean water and sanitation to all, as a human right and as a critical element to protect human health. Key global sector players have developed guidelines (Guidelines on Sanitation & Health by World Health Organisation that summarize the evidence on the effectiveness of a range of sanitation interventions and provide a comprehensive framework for health-protecting sanitation) and tools (SANIPATH - a tool developed by Emory University to assess public health risks from unsafe fecal sludge management in poor urban neighbourhoods by Emory University and Shit Flow Diagrams (SFD) - a tool developed by Centre for Science & Environment in partnership with global partners to readily understand and communicate how excreta physically flows through a city or town and population - a representation of public health hazard). The webinar will bring together learnings from field tests of these guidelines and tools from developing countries aimed at highlighting risks and opportunities to develop sanitation priorities during and post COVID 19 .

The webinar is jointly organised by the School of Water and Waste - Centre for Science and Environment (CSE) and WaterAid South Asia in partnership with WHO and Emory University on 7th July 2020 on **Safe Water, Sanitation and Health for all during and post COVID 19.**
